DISK SUBMISSION INSTRUCTIONS

Please return your final, revised manuscript on disk as well as hard copy. The hard copy must match the disk.

The Journal strongly encourages authors to deliver the final, revised version of their accepted manuscripts (text, tables, and, if possible, illustrations) on disk. Given the near-universal use of computer word-processing for manuscript preparation, we anticipate that providing a disk will be convenient for you, and it carries the added advantages of maintaining the integrity of your keystrokes and expediting typesetting. Please return the disk submission slip below with your manuscript and labeled disk(s).

Guidelines for Electronic Submission (also available at http://www.interscience.wiley.com)

Text

Storage medium. 3-1/2" high-density disk in IBM MS-DOS, Windows, or Macintosh format.

Software and format. Microsoft Word 6.0 is preferred, although manuscripts prepared with any other microcomputer word processor are acceptable. Refrain from complex formatting; the Publisher will style your manuscript according to the Journal design specifications. Do not use desktop publishing software such as Aldus PageMaker or Quark XPress. If you prepared your manuscript with one of these programs, export the text to a word processing format. Please make sure your word processing program's "fast save" feature is turned off. Please do not deliver files that contain hidden text: for example, do not use your word processor's automated features to create footnotes or reference lists.

File names. Submit the text and tables of each manuscript as a single file. Name each file with your last name (up to eight letters). Text files should be given the three-letter extension that identifies the file format. Macintosh users should maintain the MS-DOS "eight dot three" file-naming convention.

Labels. Label all disks with your name, the file name, and the word processing program and version used.

Illustrations

All print reproduction requires files for full color images to be in a CMYK color space. If possible, ICC/ColorSync profiles of your output device should accompany all digital image submissions.

Storage medium. Submit as separate files from text files, on separate disks or cartridges. If feasible, full color files should be submitted on separate disks from other image files. 3-1/2" high-density disks, CD, Iomega Zip, and 5-1/4" 44- or 88-MB SyQuest cartridges can be submitted. At authors' request, cartridges and disks will be returned after publication.

Software and format. All illustration files should be in TIFF or EPS (with preview) formats. Do not submit native application formats.

Resolution. Journal quality reproduction will require greyscale and color files at resolutions yielding approximately 300 ppi. Bitmapped line art should be submitted at resolutions yielding 600–1200 ppi. These resolutions refer to the output size of the file; if you anticipate that your images will be enlarged or reduced, resolutions should be adjusted accordingly.

File names. Illustration files should be given the 2- or 3-letter extension that identifies the file format used (i.e., .tif, .eps).

Labels. Label all disks and cartridges with your name, the file names, formats, and compression schemes (if any) used. Hard copy output must accompany all files.

Detach and return with labeled disk(s)

Corresponding author's name: _____ E-mail address: _____ Telephone: _____

Manuscript number: _____ Type of computer: _____ Program(s) & version(s) used: _____

Miscellaneous: _____

I certify that the material on the enclosed disk(s) is identical in both word and content to the printed copy herewith enclosed.

Signature: _____ **Date:** _____
